# Suffer from Pelvic Pain?

**EndoFEMM™ Heating/Cooling Pads** provide temporary, natural relief for pelvic pain caused by adhesions, endometriosis, menstrual cramps, IBS, IC, & vulvodynia by applying hot and/or cold therapy to the pelvic region. You'll see why our customers prefer it over other leading brands!

## What Makes Our EndoFEMM™ Heating/Cooling Pad Unique?

The pad's unique shape molds to the person's body when heated or cooled, further adding to the overall effectiveness.

Pad dimensions, 16.0"w x 10.5"h.

Seven separate sections provides even distribution to the body when heated or cooled.

Adjustable straps provide continuous heat retention and are removable.

When pad is cooled in the freezer, fleece provides a soft barrier to reduce the "stinging" sensation.

Supple polyester fleece provides superior warmth when heated and is super soft against the skin.

Patented "kick stand" flip feature holds pad upright when sitting and also serves as a stabilizer for the overall shape.

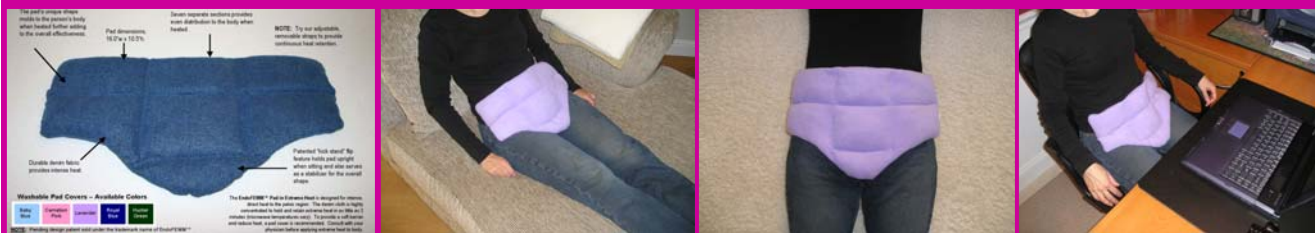

### Available Colors

The EndoFEMM™ Heating/Cooling Pad is designed specifically for women and girls who suffer from chronic pelvic pain such as Adhesions, Endometriosis, Interstitial Cystitis, Irritable Bowel Syndrome, Menstrual Cramps, and Vulvodynia. Plain and simple—EndoFEMM™ pad is superior!

**NOTE:** Pending design patent sold under the trademark name of EndoFEMM™

**Coming Soon!** The Extreme Heat Pad is guaranteed to hold heat longer and hotter than our best-selling fleece fabric (see picture of pad on model below).

**NOTE:** Pending design patent sold under the trademark name of EndoFEMM™
